# Moderma Flex

Featuring  
**QuietWear™**  
Pouch Material

Hollister Ostomy. **Details Matter.**

# HEAR the difference

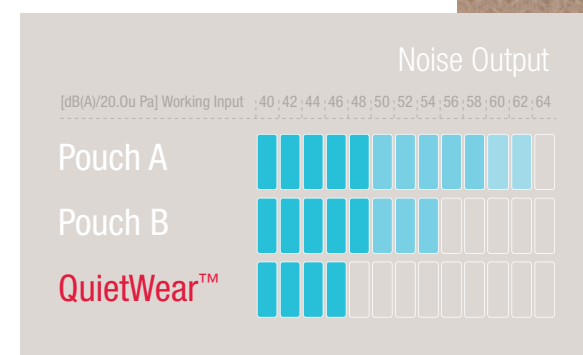

We understand that reducing embarrassing pouch noise matters to your patients. Hollister Ostomy knows that details matter.

This new pouch material **virtually eliminates** the embarrassing pouch noise sometimes found in other ostomy pouches.

In a survey of 190 established ostomists who had tried the new Hollister Moderma Flex Pouch with QuietWear™ Material:

- Over **86%** of respondents said a quiet pouch was either **very important** or **important**
- **82%** of respondents were **very satisfied** or **satisfied** that the pouch met the objective of being the quietest pouch

*Your patients should hardly know they're wearing a pouch!*

An independent testing lab shows that the QuietWear™ Material demonstrates a significant reduction in noise level when compared to other pouches available today.<sup>1</sup>

QuietWear™  
Pouch Material

# FEEL the difference

For rustle-free confidence, your choice is QuietWear™ Pouch Material

The secret behind QuietWear™ Pouch Material is an exclusive Hollister Technology.

- The first of a kind combination of **bonded film and fabric** delivers a single pouch material that will now allow you to go about your daily activities with new confidence and comfort
- The new pouch material feels smooth and is design to be one the closest things to the natural fabric found in your most comfortable clothing
- **87%** of respondents to the Moderma Flex Pouch with QuietWear™ Material survey felt that a clothing-like feel to a pouch is **very important** or **important**

*"I often found when my pouch was, shall I say 'in use,' it made a noise like a crisp packet which was most embarrassing."\**
